Layout all of the bamboo pieces as shown. The side rails matching headboard/footboard are labeled 1 through 4, starting with the left side of the headboard.

Put together the left side rail to the headboard (Labeled #1)

Beginning at the headboard end, insert the bamboo support posts into the left side rail. The posts are also labeled. Start with AB7 (support post) into AB7 (left side rail), working down to AB1.

Shows continuing the process of putting the posts in the left side rail.

The posts and side rails are marked to show how far they need to be pushed in, and when they are twisted to the proper direction.

This shows the bed with all of the bamboo support posts inserted into the left side rail.

Begin putting the support posts into the right side rail. Do not attach the right side of the headboard to the right side rail.

After putting in the first three bamboo support posts on the right side, attach, by pushing the right side of the headboard into the right side rail. (Labeled #2)

This shows the bed with the first three bamboo support posts inserted into the right side rail, and the right side rail attached with the headboard.

Continue putting the bamboo posts into the right headboard.

After pushing in all the bamboo support posts, assemble together bottom right side rail to the footboard (Labeled #3).

Finally, assemble together the bottom left side rail to the footboard (Labeled #4)

This shows the bed ready for the bamboo screws.

Use the small screwdriver to screw in each bamboo screw. There are two small openings in each corner for the screws. (8 in all). It is recommended that after there are all in, you should tighten them one more time.

After the screws are in, unroll the split bamboo support mat from one side to the other.

This shows the bed fully assembled.
